

It's getting tougher and more expensive to protect sensitive data. Meeting business demands while navigating the changing threat and compliance landscape burdens limited security and compliance resources.

SOLUTION OVERVIEW

Finally there is a fast and easy way to better protect sensitive information and demonstrate compliance. InteliSecure FXSM is a pre-packaged, managed data protection service that is up and running in days, not months. InteliSecure combines 15+ years' experience implementing and managing data protection programs with specialized data security expertise and leading security technologies to protect sensitive information and more effectively demonstrate compliance while saving time and money.

SERVICE ELEMENTS

Data Security

- **Data at Rest** - protect sensitive data whether it's stored on premises or in the cloud
- **Data in Use** - monitor how users interact with sensitive information anywhere at any time
- **Data in Motion** - protect sensitive information no matter where it goes, inside or outside your organization, including over web and email channels

Cloud Security

- Apply consistent security policies across multiple sanctioned cloud applications
- Gain visibility into which cloud applications are used in your environment
- Control how sensitive information flows into and out of unsanctioned cloud applications

Gateways

- Protect from inbound SPAM and Virus infections
- Protect from outbound data leaks on the web and email channels
- Apply controls like encryption and quarantines to sensitive information

What makes InteliSecure FXSM Easy and Fast?

- Pre-written, proven policies that address industry and regulatory requirements
- Audit-ready documentation
- Pre-built reports
- Pre-packaged, configurable service
- Simplified Pricing

Representative Outcome

Issue: "I don't know where our company's confidential data is being stored, where it's being sent and who is accessing it."

Outcome: "With InteliSecure, I have full visibility into the location and use of our sensitive data. We've mitigated 78% of stored data risks we were previously accepting, significantly reducing risk exposure to our financials and reputation."

-CISO Regional bank

SOLUTION BENEFITS

Reduce Risk

- Proven policies and expert analysts keep your critical data safe
- Protect people from inadvertently or maliciously compromising data confidentiality

Save time, money and effort

- Offload infrastructure management and reduce your daily workload
- Audit-ready documentation includes policies mapped to the regulations they support, reducing audit prep time

Faster time to impact

- Pre-packaged service has you up and running in days, not months*

More impactful reporting

- Preconfigured reports arm you with the data you need to report on risk in the language your CEO and the board understand, empowering you to demonstrate business benefits and ROI

Improve visibility and control

- Know where your company's confidential data is being stored, where it's being sent and who is accessing it... and protect it

**Co-Managed On-Premises programs take significantly longer to deploy*

SOLUTION FEATURES

Always On

- Rest easy knowing your IP and confidential data is protected around the clock

Stay on top of changes

- Continuously updated to reflect the latest threats and regulation changes

Keep the noise down

- Pre-written policies are packaged and tuned to minimize false positives

Flexible implementation Options

- Fully Managed in the cloud
- Co-Managed in the cloud
- Co-Managed On-premises

ABOUT INTELISECURE

Intelisecure is a managed security services provider specializing in data protection. With more than 15 years' experience, 500-plus clients and over 2 million users under daily management, companies large and small rely on our services and specialists to protect the integrity and safety of their sensitive information.

We make data security and compliance easy for our clients by providing more effective data protection services at lower cost, eliminating the strain on IT organizations, and reducing the risk of confidential information getting into the wrong hands.

Unlike other managed security service providers, we focus on business outcomes and arm security executives with data and reports that makes sense to business executives and ties to business goals.

Intelisecure serves clients globally with Security Operations Centers in the United States and the United Kingdom.
