

INTELISECURE ANNOUNCES RECORD Q3 REVENUE DRIVEN BY DRAMATIC GROWTH IN ITS DLP-CENTRIC MANAGED SECURITY SERVICES PORTFOLIO

Buoyed by recent wins as Symantec's Managed Innovation Partner of the Year, and a #2 position on the Denver Business Journal's ranking of fastest growing companies, the demand for Intelisecure's managed DLP services has never been stronger.

DENVER, Oct. 21, 2015 – [Intelisecure](#), the leading managed security service provider (MSSP) delivering critical asset protection for enterprise organizations worldwide, today announced it has earned record Q3 FY2015 revenues; 129 percent higher than the same period a year ago. The growth comes one year after the company received initial Series A funding from Frontier Capital. Intelisecure attributes its surge to the escalating frequency of internal and external cybersecurity threats, as well as an increasing awareness and preference among Chief Information Security Officers to lock down and protect their organization's most critical data assets.

Intelisecure was recognized as Symantec Corporation's (NYSE: SYMC) North American Managed Innovation Partner of the Year at the company's PartnerEngage 2015 event October 14-15. Also last week, the *Denver Business Journal* named Intelisecure the region's second fastest growing company among organizations earning between \$8M and \$24M annually; the commendation was a result of the company's 260 percent increase in revenues from \$3.8M in 2012 to \$13.9M in 2014.

"Intelisecure's star is on the rise thanks to the passion and innovation of our committed and valued employees who brilliantly defend our customers from today's ever-changing threat landscape," said Intelisecure co-founder and CEO Rob Eggebrecht. "Our continuous focus on critical asset protection and managed services innovation has helped differentiate Intelisecure, keeping us fresh, effective, respected, and in very high demand as we focus on becoming a global leading MSSP and the dominant DLP-focused MSSP."

Intelisecure is raising eyebrows and filling a critical void as traditional cybersecurity point products and automated tools continue to miss the mark. The daily theft and compromise of highly sensitive intellectual property, including customer and patient records, M&A correspondence, blueprints, formulae and other mission-critical assets, can have a devastating impact on the enterprise; from damage to business unit operations and financial instability, to shaken customer and investor confidence and corporate reputation.

About Intelisecure

Headquartered in the booming Denver Tech Center, Intelisecure protects more than 500 enterprise customers and three million users worldwide with managed security services tailored to safeguard enterprise assets from the escalating frequency and scale of global cybersecurity threats. Intelisecure challenges the status quo with unmatched human intelligence protection through its acclaimed Critical Asset Protection Program™ methodology, comprised of robust managed consulting, technical, incident response and security assessment services. By identifying and prioritizing critical assets such as intellectual property, Intelisecure delivers the continuous security monitoring intelligence required to protect

Level 2 - Confidential

organizations from internal and external compromise. Intelisecure has been heralded as one of North America's fastest growing companies, named to the Inc. 5000 in both 2015 and 2014, ranked second on the Denver Business Journal's 2015 ranking of fastest growing companies, and recently named Symantec's North American Managed Innovation Partner of the Year. Intelisecure reviews, recommends and provides leading security solutions from Symantec, McAfee, IBM® Security QRadar®, Websense, Proofpoint, Blue Coat, LogRhythm and Qualys, among others.
