

INTELISECURE COMPLETES ANNUAL PCI DSS CERTIFICATION

Company certified for version 3.2 within four months of its release

DENVER (September 20, 2016) – IntelliSecure, a managed security services provider specializing in critical asset protection, today announced it has received its certificate of attestation for compliance with the Payment Card Industry Data Security Standard (PCI DSS) version 3.2 for its managed security services.

PCI DSS is a set of security standards administered by the PCI Security Standards Council made up of the leading credit card companies in the industry. The standard is designed to ensure that all companies that accept, process, store or transmit credit card information maintain a secure environment. While IntelliSecure does not directly handle client credit card information, it helps organizations protect this information from accidental or malicious exposure through its managed security services and Critical Asset Protection Program (CAPP) methodology. Additional information on the standard can be found at www.pcisecuritystandards.org.

“It is important that IntelliSecure exceed the requirements put in place for our clients from any regulatory agency or standards body,” said IntelliSecure CEO Steven Drew. “Knowing and adhering to the standards and regulations our clients face allows us to better manage the security of their most critical data assets.”

In addition to providing managed security services for its clients, IntelliSecure offers support for organizations looking to become PCI DSS compliant, including security assessments, gap analyses, approved scanning vendor services, and more.

About IntelliSecure

IntelliSecure protects organizations with security services tailored to safeguard enterprise assets from the escalating frequency and scale of global cybersecurity threats. With Cyber Security Operations Centers in Denver and the U.K., IntelliSecure’s managed and professional security services deliver the continuous monitoring and intelligence required to protect against internal and external risks. The company was the first to provide managed security services for data loss prevention (DLP) and continues to be the market leader in the space by utilizing its acclaimed Critical Asset Protection Program™ methodology. IntelliSecure is one of North America’s fastest growing companies, ranking on the Inc. 5000 in 2016, 2015 and 2014, and is the recipient of numerous industry awards and accolades.
