INTELISECURE ANNOUNCES OPEN ENROLLMENT OF ITS
2018 CRITICAL DATA PROTECTION BENCHMARK SURVEY FOR INFORMATION SECURITY, RISK PROFESSIONALS

Groundbreaking survey enables respondents to: gauge the current state of their critical data protection efforts; benchmark and score their posture against that of their peers; and improve upstream reporting capabilities for senior executives and board directors.

DENVER, July 26, 2017—InteliSecure, a leading provider of critical data protection services, today announced it has opened enrollment for its 2018 Critical Data Protection Benchmark Survey, launching this September.

The groundbreaking online survey will offer senior information security and risk professionals the opportunity to:

- gauge their current critical data protection posture;
- determine how effectively they safeguard critical data assets;
- benchmark and score their protection performance versus industry peers; and
- help deliver to senior executives and board directors the assurance in knowing their organization's most sensitive digital data is protected.

"Information security executives are more challenged than ever to protect their organization's most critical data from industrial espionage, insider threats, ransomware and phishing as evidenced by the accelerating number of attacks and breaches reported," said InteliSecure CEO Steven Drew. "The Critical Data Protection benchmark survey is not just a resource, but an always-on gauge for security decision makers to assess their protection levels."

The escalating and daily compromise of highly sensitive intellectual property, including customer and patient records, M&A correspondence, blueprints, formulae and other mission-critical assets, can have a devastating impact on an organization; from damage to business unit operations and financial instability, to shaken customer and investor confidence and corporate reputation.

InteliSecure empowers organizations to identify, prioritize and protect their most critical data assets. By aligning a business-centric approach with its comprehensive suite of design, validation and managed security services, InteliSecure helps clients protect their most sensitive data assets, and manage security through scalable programs aimed at realizing business outcomes and mitigating risk.

About InteliSecure

With headquarters and 24/7 Security Operations Centers in Denver and London, InteliSecure protects over 500 enterprise clients and more than one million users globally with managed security services tailored to safeguard critical data from the escalating frequency and scale of global cybersecurity threats. InteliSecure challenges the cybersecurity industry status quo with unmatched human intelligence protection through its acclaimed Critical Asset Protection Program™ methodology, comprised of specialized managed security services, penetration testing, security assessment, consulting, technical, and GRC services.

InteliSecure has ranked on the Inc. 5000 list of Fastest Growing Companies in North America for the past four consecutive years; #2 on the Denver Business Journal's fastest growing companies, and in 2016, was named a Gartner Cool Vendor in Communications Service Provider Security Solutions (published April 20, 2016). InteliSecure supports leading security solutions from Symantec, McAfee, Forcepoint, IBM, Proofpoint, LogRhythm, TITUS, Boldon James and Qualys, among others.
