

## **INTELISECURE EARNS CREST CERTIFICATION IN THE UNITED STATES, ENSURING CLIENTS RECEIVE HIGHEST ETHICAL STANDARDS IN PENETRATION TESTING SERVICES**

***Long-standing and highly respected, CREST is an independent accreditation within the information security testing industry originating in the United Kingdom.***

DENVER, Aug. 24, 2017 – [IntelliSecure](#), a leading provider of critical data protection services, today announced it has earned [CREST](#) certification in the United States. A long-standing, highly respected independent accreditation within the information security testing industry, CREST certification provides IntelliSecure clients the assurance and confidence in knowing penetration testing services in their organization conform to and are conducted using the highest ethical industry standards.

IntelliSecure in the United Kingdom remains CREST-certified to perform security testing for commercial and government organizations in the U.K. CREST *recertification* will take place annually in both the United States and U.K. to ensure member organizations maintain their continued high standards of testing. While CREST requires organizations to recertify each year, CREST-certified personnel are required to recertify every three years to ensure standards and personnel skillsets remain current and relevant.

Key benefits to being a CREST member company include:

- increased speed of engagement with the client procurement processes;
- enhanced client assurance and confidence;
- elevated international credibility;
- enhanced knowledge sharing through access to leading industry standards guidance; and
- structured professional development.

“Our CREST accreditation in the United States demonstrates that IntelliSecure means business when it comes to security testing, and stresses the importance and need for the independent verification of ethical testing,” stated Nathan O’Hare, IntelliSecure Director of Global Security Assessments.

IntelliSecure protects over 500 enterprise clients and more than one million users globally with managed security services designed to deliver critical data protection from the escalating frequency and scale of global cybersecurity threats. IntelliSecure empowers organizations to identify, prioritize and protect their most critical data assets by aligning a [business-centric approach](#) with its comprehensive suite of design, validation and managed security services. The company’s scalable solutions and services are focused on realizing business outcomes and mitigating risk.

On Sept. 17-19, IntelliSecure will be sponsoring and exhibiting at The Channel Co’s Midsize Enterprise Summit in San Antonio. For more information on the Summit visit:
